Backend & Databases: MySQL, Eloquent ORM, Firebase Firestore, SQLite, REST API Development.

Tools: VS Code, Android Studio, Git/GitHub, Postman, Composer.

APIs & Services: Firebase, REST APIs

Operating Systems: Windows, Android

Other Skills: System Analysis, Database Design, UI/UX Design, SEO Basics, Performance Tuning.

Professional Experience

Flutter & Web Developer CyberNST | October 2025 – Present

- **Close Friend | Full-Stack Mobile Application**
 - Developed a comprehensive on-demand home services marketplace connecting homeowners with skilled professionals (plumbing, electrical, HVAC, painting, etc.).
 - **Frontend:** Built a cross-platform mobile UI using **Flutter**, ensuring a seamless experience for both service seekers and providers.
 - **Backend:** Engineered a robust RESTful API using **Laravel (PHP)** to manage user authentication, service scheduling, and real-time booking statuses.
 - **Key Features:** Integrated location-based service discovery, real-time job tracking, and a secure rating/review system to build user trust.
- **Tassawaq E-commerce Platform (Full Stack Project)**
 - Developed a complete multi-vendor e-commerce website using **Laravel** for the backend and **HTML, CSS, and JavaScript** for the frontend.
 - The platform serves as a comprehensive marketplace for various product categories including apparel, groceries, perfumes, and household detergents.
 - **Backend:** Built a secure and scalable architecture with Laravel to manage products, categories, user authentication, and order processing.
 - **Frontend:** Designed a responsive, user-friendly interface to enhance the shopping experience with dynamic product filtering and shopping cart functionality.

Freelance Projects | 2024-2025

- **Bus Transportation Booking System (Mobile Application)**
 - Developed a comprehensive mobile application concept using **Flutter** to streamline inter-city travel booking processes.
 - Engineered a user-centric interface allowing passengers to browse available trips, select preferred seating, and choose from multiple secure payment methods.
 - Integrated real-time notification systems for trip updates and an in-app ticket management module for easy access to booking history.
 - Implemented a direct communication channel with support teams to enhance user assistance and reliability.

- **Mini Car Service Workshop (Mobile Application)**
 - Designed and developed a mobile application concept using **Flutter** for a specialized car service workshop.
 - Features a dynamic digital catalog where customers can browse and select engine oils and filters compatible with their vehicle specifications.
 - Built a seamless shopping cart experience and an integrated appointment scheduling system for on-site installation and oil changes.
 - Focused on delivering a high-performance UI/UX to bridge the gap between digital product selection and physical workshop services.

WordPress Developer

Besoshial (Uae-Abu Dhabi)

January 2025 – August 2025

- Customized WordPress themes to build fully responsive, SEO-friendly websites.
- Integrated plugins such as Elementor and Yoast SEO for functionality and optimization.
- Conducted performance tuning to improve website speed and responsiveness.

Maintained and updated website content, structure, and functionality as required.
