**Other Skills:** System Analysis, Database Design, UI/UX Design, SEO Basics, Performance Tuning.

---

## **Professional Experience**

### **WordPress Developer**

*Sweida, Syria*

**January 2025 – Present**

- Customized WordPress themes to build fully responsive, SEO-friendly websites.
- Integrated plugins such as Elementor and Yoast SEO for functionality and optimization.
- Conducted performance tuning to improve website speed and responsiveness.
- Maintained and updated website content, structure, and functionality as required.

**Flutter & Web Developer** Freelance / Projects | March 2024 – Present

- **Tassawaq E-commerce Platform (Full Stack Project)**
  - Developed a complete multi-vendor e-commerce website using **Laravel** for the backend and **HTML, CSS, and JavaScript** for the frontend.
  - The platform serves as a comprehensive marketplace for various product categories including apparel, groceries, perfumes, and household detergents.
  - **Backend:** Built a secure and scalable architecture with Laravel to manage products, categories, user authentication, and order processing.
  - **Frontend:** Designed a responsive, user-friendly interface to enhance the shopping experience with dynamic product filtering and shopping cart functionality.
- **Bus Transportation Booking System (Mobile Application)**
  - Developed a comprehensive mobile application concept using **Flutter** to streamline inter-city travel booking processes.
  - Engineered a user-centric interface allowing passengers to browse available trips, select preferred seating, and choose from multiple secure payment methods.
  - Integrated real-time notification systems for trip updates and an in-app ticket management module for easy access to booking history.
  - Implemented a direct communication channel with support teams to enhance user assistance and reliability.

- **Mini Car Service Workshop (Mobile Application)**
    - Designed and developed a mobile application concept using **Flutter** for a specialized car service workshop.
    - Features a dynamic digital catalog where customers can browse and select engine oils and filters compatible with their vehicle specifications.
    - Built a seamless shopping cart experience and an integrated appointment scheduling system for on-site installation and oil changes.
    - Focused on delivering a high-performance UI/UX to bridge the gap between digital product selection and physical workshop services.
- 

## **Education**

### **Bachelor's Degree in Informatics Engineering**

University of Latakia – Latakia, Syria

---

## **Languages**

**Arabic:** Native

**English:** Excellent (Reading, Writing, Speaking)
